

Matt Quinlan
Chief Technology Officer (CTO)
Visa Inc.

Matt Quinlan was appointed to the role of Chief Technology Officer (CTO) of Visa Inc. in June 2008 and is responsible for developing and aligning Visa's technology strategy with Visa Inc.'s business goals and brand promise. This includes Visa Inc.'s technology strategy and planning functions, enterprise architecture, technology research and development and investment portfolio planning and management. Quinlan also oversees Visa Inc.'s strategic IT outsourcing program including offshore development centers.

Previously, Quinlan held the position of Chief Information Officer (CIO), Visa International Asia Pacific. Based in Singapore, Quinlan was responsible for all aspects of technology planning, systems development and operations for Visa Asia Pacific and also had responsibility for client support services for Visa Asia Pacific. As part of the Visa Inc. merger, Quinlan led the global integration program to integrate Visa's regional IT organizations into the current Global IT function including the establishment of Visa Inc.'s global technology hub in Singapore. Prior to joining Visa in 2002, Quinlan was based in Sydney and held senior technology positions with Boral, Bay Networks and Hypertec. Quinlan is currently based in Visa Inc.'s global headquarters in San Francisco.
