

CarnegieMellon

More than an IT Bachelor

# A fast-track Master

Dean, School of Information Systems, Professor Steve Miller  
bonding with students, Yvonne Lee and Benjamin Boh

When the best gets together, something breakthrough, something epochal is going to happen.

Introducing the first-ever, global fast-track SMU-Carnegie Mellon Master degree programme that promises the best of both worlds. Fully supported by Infocomm Development Authority of Singapore, through the National Infocomm Scholarship.

You get to study two years at SMU, in its famed interactive, small class size pedagogy to build a solid business and liberal arts foundation and expertise in IT solutions design. You then spend a year at Carnegie Mellon University to fulfill the SMU Bachelor degree in Information Systems. In your fourth year, you launch into one of the seven highly regarded Carnegie Mellon IT Master's programmes with the flexibility to choose specialisations ranging from infocomm technology, infocomm networking to infocomm security.

You earn a double degree, on the double: an SMU Bachelor, a Carnegie Mellon Master. And a global exposure and reputation to boot.

A prestigious government scholarship programme, IDA's National Infocomm Scholarship will support up to 40 outstanding scholars over five years for this special SMU-Carnegie Mellon Programme. If you have a head for systems and solutions plus a heart that is socially connected to serve business and humanity, then apply to be amongst the pioneer batch of NIS Scholars in the SMU-Carnegie Mellon fast-track programme.

More than an IT Bachelor, be a fast-track Master.

**Get the SMU Edge.  
Make a difference!**

Apply online at [www.smu.edu.sg](http://www.smu.edu.sg) for SMU's BSc (Information Systems Management)

Concurrently apply for the National Infocomm Scholarship before 7 April online at [www.ida.gov.sg/nis](http://www.ida.gov.sg/nis)
